Demo Zone QR codes

Here are a series of QR codes that link to online information on each of the demos at IQ2011. To access the content, you will need to use a QR code reader on your camera-enabled phone. If you don't already have a QR code reader installed, simply access your applications store and search for an application such as NeoReader or QR Code Scanner Pro.

To use a QR code reader, open the application on your device and point the camera at the QR code image. With NeoReader, QR Code Scanner Pro and the reader built into BlackBerry® Messenger, the reader will confirm that it has successfully scanned the code without you needing to press anything and gives you a prompt as to whether or not you wish to go ahead with the results. Other software may require you to press a key to start the scan. Once you have confirmed the selection, your browser opens and you are taken to the link.

There are three key areas to the IQ2011 demo zone: Innovation, Snapdragon & Connectivity.
